

SIMCards

SIM HIGH SPEED

SIM High Speed is our roadmap product based on the standardized USB communication protocol, and is intended for multimedia applications. This SIM is being developed to remove the industry fears of multimedia applications running on the SIM, increased memory needs, increasing speed and user experience at the same time.

Next Step in user interaction beyond SAT, and featuring SCWS

High capacity SIM
Mass storage enabling data portability

Enriching the legacy ISO
Product based on the standardized USB
